

Physical Education Statement of Intent

Our vision is to create physically competent and confident independent learners who lead healthy lifestyles now and in the future. We aim for all children to have a lifelong passion for being physically active.

In every lesson we aim to support the school's core values of resilience, respect, responsibility and reflection. We use the Real PE approach which ensures that every lesson has the following learning nutrients:

- create ambitious learners
- encourage children to set own personalised outcomes
- embrace failure and work on weaknesses
- encourage peer to peer feedback and praise
- develop a culture of reciprocal peer coaching
- help children make appropriate choices about taking responsibility for own learning
